St Wilfrid's Church
Duchy Road
Harrogate
HG1 2EY

Dear Father Waddington,

Re: Jn.23783 St Wilfrid's Church Upgrade 2018

This letter certifies that the PA system for the project mentioned above has been installed, tested and is functioning correctly as far as all items under our control.

We have installed and tested new loudspeakers within both the Nave and the Lady Chapel areas. All other loudspeakers within the church space have been tested and were working correctly from the correct amplifiers, and all microphone points have been tested and were working correctly.

All Rack Equipment has been installed and tested and is all functioning well, and we can confirm that your radio microphones have been set to your 4 licenced frequencies.

We can also confirm that the hearing loop system has been both extended, to cover the Quire area, and extensively tested throughout the main Nave Area and is functioning well.

Yours sincerely,

James Tremayne

Volume Controller

This is an easy guide on how to adjust volume levels for the sound system. The volume controller has 4 buttons and 4 volume knobs. By pressing each button it will change what the volume knobs control.

If you press **button 1** the volume knobs will control

1. Lapel 1
2. Lapel 2
3. Lapel 3
4. Handheld

If you press **button 2** the volume knobs will control

1. Pulpit
2. Music

If you press **button 3** the Main Nave will mute on/off

If you press **button 4** the Choir and Lady Chapel will mute on/off

Example
