Dear Father Bob,

**ST. FAITH'S CHURCH, CRASSWELL STREET, LANDPORT, PORTSMOUTH, PO1 1HT
REMEDIAL WORK RELATING TO THE WORSHIP SPACE LIGHTING SYSTEM**

Thank you for the opportunity to be involved with the project to address a series of failed light fittings within the worship space. It was a great shame that technology had advanced to such a degree that it was not possible to simply re-lamp them, however it is hoped that the new fittings will serve the church for many years.

Overall, the Parish should be commended for completing the work so diligently and with limited funds. It was also sensible to employ the skills of the electrical team to make sure that the lighting scene settings are best suited to current worship.

You should now be in receipt of the Electrical Installation Condition Report reference IPN4/0681731 that has been assembled by Burrows Electrical and focuses on the circuit that has been worked upon, so this should be kept on file and made available to anyone completing work on the electrical system. The next periodic inspection should take place in 5 years.

In the absence of a Practical Completion Certificate typical of a `construction` project I hope this letter will suitably confirm to the Diocesan Registrar that the works have, in my mind, been completed satisfactorily.

Yours sincerely,

Julian Vallis RIBA SCA AABC
