Dear Paul

ST PETER'S CHURCH, TITCHFIELD
FACULTY DATED 1st AUGUST 2017 REF 2017-007112

Following our meeting at St Peter's Church, Titchfield last month I was pleased to be consulted as inspecting architect in accordance with the Faculty Conditions and to see the following works completed:

1. Installation of new emergency lighting in the belfry ringing chamber, an emergency bulkhead light on the inside of the external door and an external light which operates by a PIR on the outside of the door to light the external steps.
2. New cupboards and work surface (to act as baby changing facilities) in the downstairs chapter room toilet.
3. Installation of new lighting in the chancel area, for which an electrical installation certificate is on record.
4. Installation of new fixed audio visual equipment.
5. Installation of a noticeboard in the south aisle.

We noted that a wooden handrail has been installed to the inside of the external steps to the vestry, but this is proposed to be replaced with a metal handrail. Information boards remain in place in the Southampton chapel at present.

Please let me know if any further correspondence is required so that you may complete administration in respect of this Faculty.

Yours sincerely

LOUISE BAINBRIDGE
