Dear Mr Semorad,

**ELECTRIC WIRING, LIGHTING AND HEATING – ST JAMES THE APOSTLE, BONDLEIGH,
NORTH DEVON. Grade I (2017-016184)**

This is a letter to confirm the physical installation and not a ratification of compliance with current legislation for the electrical installation. The installer has provided an installation certificate for those purposes.

However, I write to confirm that the works to wire the church for the purposes of heating and lighting have been completed. The heating and lighting are working satisfactorily, and the route of wiring was done sensitively and carefully and to a good standard. The making good after installation has also been done to a high standard.

Yours sincerely

Jeremy Chadburn
