

Part P No: N/A

ELECTRICAL INSTALLATION CERTIFICATE

Issued in accordance with BS 7671: 2018 - Requirements for Electrical Installations

This certificate is not valid if the serial number has been defaced or altered

290685 | CCR18

Original to the person ordering the work

PART 1 : DETAILS OF THE CONTRACTOR, CLIENT AND INSTALLATION

DETAILS OF THE CONTRACTOR

Registration No: 031679000 Branch No*: N/A
 Trading Title: Cloakes Ltd
 Address: Unit J, Forge Meadow, Canterbury Road, Hawkinge, FOLKESTONE, Kent
 Postcode: CT18 7JA Tel No: 01303 894850

DETAILS OF THE CLIENT

Contractor Reference Number (CRN): 1346A
 Name: Charlter Construction Ltd
 Address: Ashford Road, Newingreen, HYTHE, Kent
 Postcode: CT21 4JB Tel No: 01303 268211
 Postcode: CT15 4H Tel No: N/A

DETAILS OF THE INSTALLATION

Occupier: The Church of St Mary The Virgin
 Address: The Church of St Mary The Virgin, Pinners Lane, Nonnington, DOVER, Kent

PART 2 : DETAILS OF THE ELECTRICAL WORK COVERED BY THIS INSTALLATION CERTIFICATE

Date works completed: 16/03/2021 Description and extent of the installation covered by this certificate:

Installation of additional circuits supplied from DB3 and DB4 supplying lighting and power associated with disabled W.C. and Tea Making works.

New:

An addition:
 An alteration:
 Replacement of a distribution board:

Where necessary, continue on a separate numbered page: Page No(s) (N/A)

PART 3 : NEXT INSPECTION OF THE ELECTRICAL INSTALLATION

We, being the designer(s) of the electrical installation as documented in PART 4, RECOMMEND that this installation is further inspected and tested after an interval of not more than:

5 years**

PART 4 : DECLARATION FOR THE ELECTRICAL INSTALLATION WORK (this option may be used where the design, construction, inspection & testing have been the responsibility of one person)

DESIGN, CONSTRUCTION, INSPECTION & TESTING (The extent of liability of the signatories is limited to the work detailed in PART 2)

I, being the person responsible for the design, construction, inspection and testing of the electrical installation, particulars of which are described in PART 2, having exercised reasonable skill and care when carrying out the design and additionally where this certificate applies to an addition or alteration, having confirmed that the safety of the existing installation is not impaired, hereby CERTIFY that the design, construction, inspection and testing for which I have been responsible is to the best of my knowledge and belief in accordance with BS 7671: 2018, amended to (date) except for the departures, if any, detailed on attached page(s) (N/A) (Regulations 120.3, 133.1.3 and 133.5).
 Permitted exception applied (411.3.3): N/A Risk assessment attached: Page No(s) (N/A) Where selectivity is required, details of the verification appended (536.4): Page No(s) (N/A)

Name (capitals): N/A Signature:

Date:

REVIEWED BY QUALIFIED SUPERVISOR

Signature:

Date:

Please see the 'Notes for Recipient'

*Where applicable ** The proposed date for the next inspection should take into consideration any legislative or licensing requirements and the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life.
 The period should be agreed between relevant parties.

This certificate is based on the model forms shown in Appendix 6 of BS 1671

ELECTRICAL INSTALLATION CERTIFICATE

Original to the person ordering the work

Issued in accordance with BS 7671-2018 - Requirements for Electrical Installations

DESIGN (The extent of liability of the signatories is limited to the work detailed in PART 2)

I/We being the person(s) responsible for the design of the electrical installation, particulars of which are described in PART 2, having exercised reasonable skill and care when carrying out the design and additionally where this certificate applies to an addition or alteration, having confirmed that the safety of the existing installation is not impaired, hereby CERTIFY that the design work for which I/we have been responsible is to the best of my/our knowledge and belief in accordance with BS 7671: 2018, amended to 01/01/2019..... (date) except for the departures, if any, detailed on attached page(s) (N/A.....) (Regulations 120.3, 133.1.3 and 133.5).

Permitted exception applied (411.3.3): N/A

Risk assessment attached: Page No(s) (N/A.....)

DESIGNER 1 Name (capitals): MR D CLOAKE..... Signature: Date: 01/03/2021.....

DESIGNER 2 (where there is divided responsibility for design) Name (capitals): N/A..... Signature: Date:

CONSTRUCTION (The extent of liability of the signatories is limited to the work detailed in PART 2)

I, being the person responsible for the construction of the electrical installation, particulars of which are described in PART 2, having exercised reasonable skill and care when carrying out the construction, hereby CERTIFY that the said work for which I have been responsible is, to the best of my knowledge and belief, in accordance with BS 7671: 2018, amended to 01/01/2019..... (date) except for the departures, if any, detailed on attached page(s) (N/A.....) (Regulations 120.3 and 133.5).

Name (capitals): MR P RICHARDS..... Signature: Date: 01/03/2021.....

INSPECTION & TESTING (The extent of liability of the signatories is limited to the work detailed in PART 2)

I, being the person responsible for the inspection and testing of the electrical installation, particulars of which are described in PART 2, having exercised reasonable skill and care when carrying out the inspection and testing, hereby CERTIFY that the said work for which I have been responsible is, to the best of my knowledge and belief, in accordance with BS 7671: 2018, amended to 01/01/2019..... (date) except for the departures, if any, detailed on attached page(s) (N/A.....) (Regulations 120.3 and 133.5).

Name (capitals): MR P RICHARDS..... Signature: Date: 01/03/2021.....

REVIEWED BY QUALIFIED SUPERVISOR

Name (capitals): MR M JAMES..... Signature: Date: 16/03/2021.....

PART 5 : COMMENTS ON THE EXISTING INSTALLATION (in the case of an addition or alteration see Regulation 644.1.2)

Not inspected or covered by this certificate. Extensive works being undertaken by others. A condition report will be issued for that.

Where necessary, continue on a separate numbered page: Page No(s) (N/A.....)

Where the electrical work to which this certificate relates includes the installation of a fire alarm system and/or an emergency lighting system (or a part of such systems), this electrical safety certificate should be accompanied by the particular certificate(s) for the system(s).

This certificate is based on the model forms shown in Appendix 6 of BS 7671. Enter a (✓) value in the respective fields, as appropriate. Where an item is not applicable insert N/A

PART 9 : SCHEDULE OF ITEMS INSPECTED - continues on next page

1. External condition of electrical intake equipment (visual inspection only)				
1.1 Service cable:	(✓) 1.2 Service head:	(✓)	3.3 FE LV – requirements satisfied:	(N/A)
1.3 Earthing arrangement:	(✓) 1.4 Meter tails:	(✓)	3.4 Reduced low voltage – requirements satisfied:	(N/A)
1.5 Metering equipment:	(✓) 1.6 Isolator (where present):	(✓)	4. Additional protection	
			4.1 The presence and effectiveness of additional protection methods used, as follows:	(✓)
			a) RCDs not exceeding 30 mA operating current, as specified	(✓)
			b) Supplementary bonding	(✓)
			5. Basic protection / For use in controlled / supervised conditions only	
			5.1 Presence and adequacy of protective measures to provide basic protection:	(✓)
			a) Insulation of live parts	(✓)
			b) Barriers or enclosures	(✓)
			c) Obstacles †	(N/A)
			d) Placing out of reach ‡	(N/A)
			6. Basic and fault protection	
			6.1 SELV	(N/A)
			6.2 PELV	(N/A)
			6.3 Double or reinforced insulation	(N/A)
			<i>When used, provide details on a separate numbered page:</i>	Page No (N/A)
			7. Distribution equipment	
			7.1 Adequacy of working space / accessibility:	(✓)
			7.2 Security of fixing:	(✓)
			7.3 Insulation of live parts not damaged during erection:	(✓)
			7.4 Adequacy / security of barriers:	(✓)
			7.5 Suitability of enclosures for IP and fire ratings:	(✓)
			7.6 Enclosures not damaged during installation:	(✓)
			7.7 Presence and effectiveness of obstacles:	(✓)
			7.8 Presence and operation (functional) check of main switch(es):	(✓)
			7.9 Components are suitable according to assembly manufacturer's instructions or literature:	(✓)
			7.10 Operation of circuit-breakers and RCDs to prove functionality:	(✓)
			7.11 RCD(s) provided for fault protection, where specified:	(N/A)
			7.12 RCD(s) provided for protection against fire, where specified:	(N/A)
			7.13 RCD(s) provided for additional protection, where specified:	(✓)
			7.14 Confirmation overvoltage protection (SPDs) provided, where specified:	(✓)

ELECTRICAL INSTALLATION CERTIFICATE

PART 9 : SCHEDULE OF ITEMS INSPECTED

8.13 Wiring systems and cable installation methods / practices appropriate to the type and nature of installation and external influences:	(✓)	8.24 Adequacy of connections, including cpos, within accessories and at fixed and stationary equipment:	(✓)
8.14 Cables concealed under floors, above ceilings, in walls / partitions, adequately protected against damage:	(✓)	9.1 Isolators:	
8.15 Cables installed in walls / partitions, installed in prescribed zones:	(✓)	a) Presence and location of appropriate devices b) Capable of being secured in the OFF position c) Correct operation verified (functional check)	(N/A)
8.16 Provision of additional protection by RCDs having rated residual operating current ($I_{\Delta n}$) not exceeding 30 mA:	(✓)	d) The installation, circuit or part thereof that will be isolated is clearly identified by location and / or durable marking	(N/A)
a) For all socket-outlets with a rated current not exceeding 32 A or less, unless exempt	(✓)	e) Warning notice posted in situations where live parts cannot be isolated by the operation of a single device	(N/A)
b) For supplies to mobile equipment with a current rating not exceeding 32 A for use outdoors	(N/A)	f) Switching off for mechanical maintenance:	(N/A)
c) For cables concealed in walls / partitions at a depth of less than 50 mm	(✓)	a) Presence of appropriate devices b) Acceptable location (local or remote)	(N/A)
d) For cables concealed in walls / partitions containing metal parts regardless of depth	(N/A)	c) Capable of being secured in the OFF position	(N/A)
e) For circuits supplying luminaires within domestic (household) premises only	(N/A)	d) Correct operation verified (functional check)	(N/A)
8.17 Provision of fire barriers, sealing arrangements so as to minimise the spread of fire:	(✓)	e) The installation, circuit or part thereof to be disconnected clearly identified by location and / or durable marking	(N/A)
8.18 Band II cables segregated / separated from Band I cables:	(✓)	9.3 Emergency switching / stopping:	
8.19 Cables segregated / separated from non-electrical services:	(✓)	a) Presence of appropriate devices b) Readily accessible for operation where danger might occur	(N/A)
8.20 Termination of cables at enclosures:	(✓)	c) Correct operation verified (functional check)	(N/A)
a) Connections under no undue strain	(✓)	d) The installation, circuit or part thereof to be disconnected clearly identified by location and / or durable marking	(N/A)
b) No basic insulation of a conductor visible outside enclosure	(✓)	e) Firefighter's switches present, where required:	(N/A)
c) Connections of live conductors adequately enclosed	(✓)	9.4 Functional switching:	
d) Adequately connected at point of entry to enclosure	(✓)	a) Presence of appropriate devices b) Correct operation verified (functional check)	(✓)
8.21 Suitability of circuit accessories for external influences:	(✓)		
8.22 Circuit accessories not damaged during erection:	(✓)		
8.23 Single-pole devices for switching or protection in line conductors only:	(✓)		

PART 10 : SCHEDULES AND ADDITIONAL PAGES

Schedule of Inspections	Schedule of Circuit Details and Test Results for the installation	Additional pages, including data sheets for additional sources	Special installations or locations indicated in item 11 above	Continuation sheets
Page No(s): 4 & 5	Page No(s): 6	Page No(s): N/A	Page No(s): N/A	Page No(s): N/A

The pages identified are an essential part of this certificate.

ELECTRICAL INSTALLATION CERTIFICATE

ADDITIONAL NOTES

N/A

(see additional page No. N/A)

Page 9 of 10

NOTES FOR RECIPIENT

THIS CERTIFICATE IS AN IMPORTANT AND VALUABLE DOCUMENT WHICH SHOULD BE RETAINED FOR FUTURE USE

If you were the person ordering the work, but not the user of the installation, you should pass this certificate, or a full copy of it including these notes, the schedules and additional pages (if any), immediately to the user.

This safety certificate has been issued to confirm that the electrical installation work to which it relates has been designed, constructed, inspected, tested and verified in accordance with the national standard for the safety of electrical installations, BS 7671: 2018 (as amended) - Requirements for Electrical Installations (the IET Wiring Regulations).

Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested every six months. For safety reasons it is important that this instruction is followed.

Also for safety reasons, the complete electrical installation will need to be inspected and tested at appropriate intervals by a skilled person or persons competent in such work. NICEIC* recommends that you engage the services of an NICEIC Approved Contractor for this purpose. The maximum interval recommended before the next inspection is stated in PART 3. There should be a notice at or near the main switchboard or distribution board indicating the date when the next inspection is due.

Only an NICEIC Approved Contractor or Conforming Body responsible for the construction of the electrical installation is authorised to issue this NICEIC Electrical Installation Certificate.

The certificate, which consists of at least six numbered pages, is only valid if accompanied by the Schedule of Items Inspected and the Schedule of Circuit Details and Test Results. The certificate has a printed serial number which is traceable to the Approved Contractor to which it was supplied by NICEIC.

For installations having more than one distribution board (or consumer unit) or more circuits than can be recorded on Page 6, one or more additional Schedules of Circuit Details and Test Results, should form part of the certificate.

This certificate is intended to be issued only for a new electrical installation or for new work associated with an addition or alteration to an existing installation, or for the replacement of a distribution board (or consumer unit). It should not have been issued for the inspection of an existing electrical installation. An 'Electrical Installation Condition Report' should be issued for such a periodic inspection.

This certificate should not have been issued for electrical work in a potentially explosive atmosphere (hazardous area) unless the Approved Contractor holds an appropriate extension to their NICEIC registration for such work.

You should have received the certificate marked 'Original' and the Approved Contractor should have retained the certificate marked 'Duplicate'.

The 'Original' certificate should be retained in a safe place and shown to any skilled person inspecting or undertaking further work on the electrical installation in the future. If you later vacate the property, this certificate will demonstrate to the new user that the electrical installation complied with the requirements of BS 7671 at the time the certificate was issued.

The Construction (Design and Management) Regulations require that, for a project covered by those Regulations, a copy of this certificate, together with schedules, is included in the project health and safety documentation.

Page 1 and 2 of this certificate provide details of the electrical installation, together with the name(s) and signature(s) of the person(s) certifying the three elements of installation work: design, construction and inspection and testing, and page 3 identifies the organisation(s) responsible for the work certified by their representative(s).

Certification for inspection and testing provides an assurance that the electrical installation work has been fully inspected and tested, and that the electrical work has been carried out in accordance with the requirements of BS 7671: 2018 (as amended) (except for any departures sanctioned by the designer and appended to the certificate).

Where responsibility for the design, the construction and the inspection and testing of the electrical work is divided between the Approved Contractor and one or more other bodies, the division of responsibility should have been established and agreed before commencement of the work. In such a case, NICEIC considers that the absence of certification for the construction, or the inspection and testing elements of the work would render the certificate invalid. If the design section of the certificate has not been completed, NICEIC recommends that you question why those responsible for the design have not certified that this important element of the work is in accordance with BS 7671.

Where the electrical work to which this certificate relates includes the installation of a fire alarm system and/or an emergency lighting system (or a part of such systems) in accordance with British Standards BS 5839 and BS 5266 respectively, this electrical safety certificate should be accompanied by a separate certificate or certificates as prescribed by those standards.

Where a number of sources are available to supply the installation, and where the data given for the primary source may differ from other sources, an additional page should have been provided which gives the relevant information relating to each additional source, and to the associated earthing arrangements and main switchgear.

Should the person ordering the work (e.g. the client, as identified on Page 1 of this certificate), have reason to believe that any element of the work for which the Approved Contractor has accepted responsibility (as indicated by the signatures on this certificate) does not comply with BS 7671: 2018 (as amended), the client should in the first instance raise the specific concerns in writing with the Approved Contractor. If the concerns remain unresolved, the client may make a formal complaint to NICEIC, for which purpose a standard complaint form is available on request.

The complaints procedure offered by NICEIC is subject to certain terms and conditions, full details of which are available upon application. NICEIC does not investigate complaints relating to the operational performance of electrical installations (such as lighting levels), or to contractual or commercial issues (such as time or cost).

* NICEIC is operated by Certsure LLP, a partnership between the Electrical Contractors' Association and the charity, Electrical Safety First. NICEIC maintains and publishes registers of electrical contractors that it has assessed against particular scheme requirements (including the technical standard of electrical work).
