Stone and brass monuments to north wall to be repositioned -as indicated

Radiator to be replaced with smaller fitting to fit between partition and arch

-WC and cleaning cup'd enclosure to be SW framed with insulation and timber panelling, ceiling and timber cornice trims. Walls built off tower with infill fillet to meet existing lean and to provide ventilation to protect fabric of church Ironmongery and -internal finishes tbc

New symmetrical painted timber panelled partition with central door spanning from north to south walls of tower. West door (currently not used) still accessible beyond screen. Lean of tower walls shown indicatively only - to be surveyed accurately on site before finalising design and commencing construction designed to meet walls

-Large stone monument at high level on south wall of tower to remain as existing, still visible behind partition with storage area below

-Secure storage cupboard formed with panelled door to match partitions with painted plasterboard finish to interior
