

New gravity foul drain beneath path with inspection chamber/rodding eye as required

Pump added to MH1 connecting to drainage from existing kitchen and drainage from new WC

RevC: Proposed route of small bore foul drainage pipe beneath grass, from new WC and existing kitchen to connect to combined drain MH3

Proposed air extract routed through north wall of tower and out through boiler room roof. Drainage to be kept above ground within church and routed through north wall at low level, and taken under boiler room to connect with existing service runs (subject to detailed survey).

New painted timber panelled enclosure to form accessible WC and cleaning cupboard in northwest corner of the Tower.

Partition to extend over new central door, and around storage to southwest corner of tower as shown.

West door remains operational.

Existing cupboard enclosure to be removed shown in red dashed line

Font to be lowered by removing base and relocated closer to the Nave in order to allow circulation space in front of new partitions.

RevC: Ledger with border to remain in existing location and font to be repositioned further east towards nave.

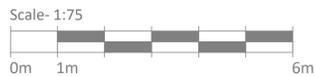

RevC: Gibbons stone wall monument on south wall of tower to be raised above height of new partitions to allow visibility.

Existing stone floor slabs (shown indicatively) to remain in situ where possible - any additional required when font or ledger moved to be reclaimed stone to match existing

Tarmac Footpath

Proposals for Memorial Garden removed from this faculty application.
