

# Application 2024-098489 Frome St John the Baptist Glazed doors

## Additional information

Photos of the internal west end doors  
that we are proposing to replace with glazed doors

The internal doors viewed from inside

The internal doors viewed from outside.

### Significance:

We know of no specific significance for these doors. They were installed as part of the Victorian re-ordering of the inside of the church in the 1850s. The original design included some glazing, but instead they were fully filled in with wood.

The entrance porch, which includes boarded doors forming recessed cupboards to both sides, and a pair of large external boarded doors are all to be retained as existing.
