

Electrical Requirements for AV System

Job: **St Mary's Church, Lymm**

Various electrical supplies shall be required for the audiovisual system. If supplies are already planned in the positions listed below, we are happy to use these. Where there is a requirement for supplies to be on the same circuit/ phase this has been shown. If it is preferential from an electrical point of view to have all supplies on the same circuit, this is acceptable.

Item	Location	Outlet Required	Notes	Circuit
E1	AV control desk	3x Double sockets within AV desk switched via an isolator	Sockets to be within AV desk, with isolator in an accessible position. Exact location to be agreed	
E2	Projector	1x Double socket	To power projector and PTZ Camera. Socket located beneath projector bracket	
E3	Twin Motor Screen	1x Double socket	On back side of chancel arch at high level, organ North side	
E4	Reference Monitor North	1x Double socket	Behind where N Reference Monitor is to be fitted	
E5	Reference Monitor South	1x Double socket	Behind where S Reference Monitor is to be fitted	
E6	North Camera	1x Double socket	To match socket for projector on pillar on opposite side of church. To power camera
