

Heating Proposal – Infrared Secondary Heaters under balcony

Mark Preddy outlined a scheme to install secondary infrared heating under the gallery to reduce our energy footprint when holding meetings when we would normally heat the whole building. The proposal will cost a total of £3,050 and should achieve a payback in under five years and have a positive impact on our “eco church” goals.

Proposed Mark Preddy, Seconded Paul Elliott

Agreed by PCC on 17th September 2025

Note – signed by Chair

A handwritten signature in dark ink, appearing to read 'Jon Ormrod', followed by a long horizontal line that extends to the right and then loops back under the signature.

Rev Jon Ormrod - Vicar
