Dear Joanne

Sally Moralee, one of our P.C.C. members has searched the log book and terrier. There is no certificate of completion for the heaters. However, there is a reference in the logbook made by the Churchwarden at the time:

'November 12th 2019: Installation of 6 wall heaters by Tansun. Radiant 'Apollo'
. Electrical installation of heaters was carried out by David Campbell of Matrix of Lyme Regis, who was recommended by Layzells, our current builders.'

Since then, we have had a full electrical inspection done recently in the Church and we have a report for that.

I hope this information helps, but that's all we have.

Dear Joanne

The electrical heaters were installed by Matrix Electrical in 2019. I am asking people to see if there is a completion report relating to this work, as I did not deal with this.

Philip Hughes Associates, the Historic Buildings Consultants were involved, because there is a payment to them relating to heating in the accounts book of that period.

I will let you have the completion report if I can locate one and many thanks.
