Hi Tim

I've done a budget estimate which I hope is helpful at this stage for your meeting. To get a more accurate quotation I would need to do a measured drawing of the location, prepare a schedule of works and get labour cost figures from Tom Rees and stone supply figures from a stone supplier like Ham and Douling Stone Ltd. I just need a bit more time to do this. I could get it done over the next two weeks.

Budget estimate for design and installation of new stone and slate pavement outside the church porch.

1. Measured drawing and Design 4 days @ £250 = £1000
2. Preparation of site, levelling of ground, re-laying of drainage, re-fixing of stone border with lawn 5 days @ £300 = £1500
3. Preparing reused roof slates 2 days @ £300 = £600
4. Supply of new Ham stone, blue and white lias pavement stones = £2500
5. Installation of stone and slate mosaic pavement 5 days @ £300 = £1500
6. Site supervision/advice during installation £400

Total budget estimate cost £7500

Best wishes

Nick
